Design Review: With Design Review, you can review your design changes before you sign off on the design. This process will help to ensure that your design won't get approved or signed off on by accident. Design Review can also be used for those projects that need to be approved by a design expert. (video: 1:48 min.) Now you can write comments in 2D and manage and communicate them from anywhere with your mobile device. Protection, security and collaboration: AutoCAD 2023 now protects your drawings by creating an encrypted container for your designs. Drawings can be accessed by only the person who created them. Protect your designs with password protection and keep them safe with a cloud back-up service. When you create a drawing, you can share it with a team with only Read and Edit permissions. You can also give individual users permission to add edits to your drawing. AutoCAD has a new collaboration environment, AutoCollab, that allows you to work with team members and work on projects together. Whether you're working on the same drawing or on different projects, you can collaborate with team members to create a shared drawing that everyone can access.
