Automatic PC Shutdown Pro [2022-Latest]

Feature Name - Cheap Automatic Windows Shutdown Pro v9.3.0.28 Free Download by: AutomaticPCShutdownPro Last updated: October 9th, 2017 Automatic Windows Shutdown Pro is a software application that helps you schedule a log off, hibernation, stand by, shutdown, or reboot session with minimal effort. User-friendly layout The tool implements an intuitive behavior, so even less experienced users can easily discover and tweak its functions. You can switch between the Main panel of the program which embeds all dedicated parameters that you need to work with for scheduling a shutdown session or check out the Options tab for configuring extra settings. Scheduling shutdown sessions Automatic Windows Shutdown Pro gives you the possibility to select the action that you want to trigger, namely log off, stand by, hibernate, shutdown, or restart, set up the recurrence parameters (every day or only the selected days), as well as specify a user-defined time. What's more, you can make the application turn off the monitor, check out the current and remaining time displayed in the primary window, as well as start or stop the current task. Extra settings to play with You can run the tool at Windows startup, allow users to stop the shutdown task, start the timer when the application runs, as well as open a custom program from your computer before an action is triggered. Performance Tests have revealed that Automatic Windows Shutdown Pro carries out a task very quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not affected. An overall efficient shutdown utility To sum things up, Automatic Windows Shutdown Pro brings to the table some handy features that you can work with in order to schedule your computer to shut down, reboot, or perform another similar process. ChoreStory offers Windows cleaning, defragmentation and data optimization utilities. As cleaning a windows computer is almost like cleaning the surface of the moon, they can make it hard to tell whether they are doing a good job or not. And how do you know if your PC is clean? Windows provides a basic level of cleaning with Windows Defrag which is also included with a Windows PC. However, it only does partial cleaning. What it does is find all the space where files can be placed in the hard disk and reorganize them so that all of the file data is placed closer to the end of the disk. While this
