The fearsome region of the Lands Between is finally at peace, after an unspecified number of years. The harmony brought about by the troubles of the past has strengthened the people's resolve, and the members of the Westcrown military have returned to the Westcrown. However, the lands between the Westcrown and the Eastcrown are still unsettled, and no one knows how the situation will turn out. A few knights and magicians gather inside the Great Earth, the central continent of the Lands Between, to keep watch over the territory. There, a war was declared with the Eastcrown after a mysterious accident befell the princess of the Eastcrown. While watching over the land, a knight named Mana, who was known to be the best swordsman in the Westcrown, had his memories of his past life gradually erased from his mind. He began to develop intense feelings towards the princess of the Eastcrown, and went on a journey seeking her. Rise, a self-proclaimed "hero" of the Lands Between, arrives in the lands of the Westcrown and meets the princess of the Eastcrown. However, she is strangely accompanied by a half-elf, and is also on a journey to "the east"—the east being the wilderness between the lands of the Westcrown and the Eastcrown. The two girls and the half-elf, who are searching for a sword imbued with an ancient magic, end up traveling through the Lands Between together. Elden Ring With Key [March-2022]

Now look, I'm a particular fan of RPGs (role playing games) not just one in particular but many. I still get excited every time I enter Final Fantasy or Pokemon's world. I like the RPG genre of the MMORPG (massively multiplayer online role playing games) and like to play them. So if there's a game that can fall under that I can say it's a great game. I played a few hours of the beta version on smartphone and can say that it is really fun and interesting and immersive. But it is not. I think that they should work on it more on the game. I had no idea how an RPG was like and I don't even know how to make my character in the game. But it's really fun because I can just create a character and go. I started by making a fighter and a wizard and this kind of RPG format is very interesting. I guess that it's a kind of game that will be very popular in the future. Well, it's simple, great and innovative. I'm very excited about this game. I guess it can be a good buy for someone who likes RPG. I recommend this game. ADVANCE PITCH This is the first dragon egg hatched from a herd of eggs laid in the mountains by the eight great Kings who ruled the Lands Between. Renowned for its power, this egg has been carefully guarded for thousands of years. As our troubled lands become engulfed in civil war and chaos, the creature hatches, revealing a talisman that awakens and calls forth the light of an ancient power. So long hidden, the light of this ancient power draws the seven great tribes of each side to unite in a conflict that will consume the Land Between. YOUR CHARACTERS You and your companions are caught up in the legendary war raging across the Lands Between. As you play, you will establish your own characters and create a legend as you rise to become a Warrior, a Magician or even a Guild Master. GAME MECHANICS The Lands Between are experiencing civil war and chaos, and the dragons have hatched. To protect the lands, seven great tribes have clashed in battle against each other, and the result is a ravaged landscape. The Great Dragons, companions of your legendary artifact, calls you forth to save the Lands Between... bff6bb2d33

"When the crust is broken, they fill the room with questions about their family, their beliefs, their place in the world." Oct. 26, 2017 | By Shellee DeSantos Not even four weeks into their marriage, a young couple whose band practiced and lived together told salon.com, "We were happy. Our relationship was going really well." The realization that they were still in love, and that it was real, came around the time that his pregnant wife started showing her belly. "It was at that time we saw that we had a life together," he said. "When the crust is broken, they fill the room with questions about their family, their beliefs, their place in the world." Their relationship hit a period of drought the following year, and the couple started to get apart. But once they ended it, he found himself in a new position, wherein he was single. He didn't want to go back to being single again. What he needed was a new definition of home, one that was both romantic and practical. "That idea intrigued me the most because I realized it could really happen," he said. So he began to visit houses and apartment buildings in New Orleans, as well as buildings in other cities across the U.S. — searching for locations that were still, to some extent, accessible to his lover. Eventually, he chose a spot in the French Quarter, where he imagined he and his wife could start a more traditional life for their family. It also had the advantage of being near to his family, who could visit him at the house. "It's the perfect location for us," he says. "It is a perfect place in the city for the two of us to live together, in our own place." He found a condo on the edge of the historic district, surrounded by historic sites, museums, and restaurants. "We thought we were going to find the perfect spot to make it work," he said. "We went out to
