Terra Earth Gameplay on YouTube - Sorting an array according to the order of another array (in Python) I have 2 arrays: arr1 = [[1,2,3],[2,3,4],[2,3,5]] arr2 = ['a','b','c'] I want to sort arr1 based on the order of arr2, therefore, I want to get arr1 = [[2,3,5],[2,3,4],[1,2,3]] I have tried using a "for" loop, but I am unable to get the right result. A: Wouldn't it be simpler to use sorted: arr1 = sorted([a[1] for a in arr1]) >>> [a[0] for a in arr1] >>> ['b', 'a', 'c'] Explanation: Start by making a copy of arr1: [a[1] for a in arr1] >>> [2, 3, 5] Use list comprehension to get the second number of each list in arr1: >>> [a[1] for a in arr1] >>> [2, 3, 5] Call sorted on the list of numbers. >>> sorted([a[1] for a in arr1]) >>> [2, 3, 5] The use of mobile devices is widespread. For example, in 2008, the number of mobile telephone users exceeded the number of fixed land line telephone users for the first time. That trend is expected to continue. As the number of mobile

It is extremely strong and has a big cannon and machine gun. It is a weapon that does not break easily. Its appearance is sleek, with a deep body and a long machine gun barrel. It has no turret and a hard upper part, so it is hard to take. It is a tank with a big cannon and machine gun that can be seen on the left and right sides. It can fire continuously by pressing the fire button. The main weapon is a machine gun which can fire at a high rate of fire. The machine gun can be used at the front of the tank and the side machine gun. By using the machine gun from the front or the side, the ability to deal with enemy tanks and large vehicles is more effective. The lower body of the tank is very thick so the capacity is huge. You can not see the movement of the crosswalk. The lower body cannot be seen. The view field is the front of the tank. A. Fire button B. Gun button C. Grenade button D. What's new:

You can make any colors you want with this, just make sure you use a bright color that won't show up in the lighting. Step 6: Establish the 3 Circles When the bubbles have spread out, hold the paper steady and look around the perimeter of the paper at the light in the dark. If you see the blur of a layer underneath the paper or ink, that's the ink. Flip the paper over and in front of you is one big blur; try to adjust the even the layer of the paper (going over the areas with your hand). The more you adjust the more control you have over the look and feel of the art. Your art will look different than mine depending on what colors you choose to use. Here are some samples that do not look alike. For this art, you need to tell the light bulb that it cannot shine under each bubble or else all the colors will blur. Step 7: Write Random Words With a pencil, write a line of words that are random and that has nothing to do with one another and tape that part up. Then do the same for this piece and tape that up. Step 8: Add Color Using paint pens or markers, ink random shapes onto the page (you won't need to work them in as you wait for them to dry). Step 9: Write an Object Using the Circles Using a sharpie, write an object on top of the page. It would probably be best to do this in a table. You can also do it by the counter, but make sure to have your legs and arms tucked so they can't reach. However, you don't have to be in tight (a few feet away will be fine). Here's an example if you want to mess around with this. Step 10: Send Us Your Art! Get all the details from Step 10 and have fun! 3 Times A Circle You can make almost any colors you want with this, just make sure you use a bright color. Step 1: Establish the 2 Circles With your pointing finger, stretch one of the circles into a wall. Remove your finger so the bubble takes a breath and gently push down on the paper, making a hole so that the bubbles will spread out and let the background layer (ink, paper, etc.) show through. Step 2: Est

Moon.Mars is a Pixel Art action-Adventure puzzle platformer available now on all major platforms including PC, Mac, Linux, PS4, and X-Box One. This is not your ordinary job. Survive as long as you can, avoid all the traps, and find the portal that will take you home to Earth. Moon.Mars is inspired by one of the most beloved puzzle platformers ever made, PaRappa The Rapper. The game was featured in the most recent 90 games in 30 days event. Can it stand up to the challenge? - Control: Use your mouse to manipulate things in the game - Inventory: Open your inventory by pressing the tab key. Look for upgrades, items, weapons, and everything else to help you get out of a sticky situation. - Camera: Use the camera to see what's behind a wall, behind a door, what's in a dangerous area, and observe your surroundings. - Missions: From the difficulty settings, you can choose to play a single (normal) mission, or a main story mission followed by a challenge mode mission (which is exactly like a single, except that you have limited time on each checkpoint). - Rewind time: Use the REWIND key to look at what happened previously in the timeline. Use the confirm button to use it. - Gamepad: There are two Gamepad buttons. Aim with them. - Achievements: Earn achievements by accomplishing tasks in the game. You can view them using Steam's achievements browser. Click the acheivement to view details and to see which achievements you're missing. - Steam leaderboards: Play to your friends on the leaderboards using your Steam account. - The Hireling The Hireling is a mysterious character who is in the game from the beginning until the end. His disposition, however, is not one of friendship. And when you're not looking, he can be quite a villain. - Complete the main story and challenge mode missions to unlock the unlockable game extras. - Pixel art For more information and screenshots visit the Moon.Mars website at www.moonmars.com - The Journey is the end of the line. - On Moon.Mars you will find the following game play options: - Fast - Normal - Slow - Classic (
